

ABOUT HTEC

HTEC operates across the clean hydrogen value chain , building sustainable, regionally connected ecosystems that are fueling Canada's transition to zero-emission transportation.

OUR SOLUTIONS

The world requires a suite of options to attain net zero and hydrogen's versatility makes it an irrefutable part of the solution.

As the first company to establish and operate Canada's hydrogen refueling station network, we design, build, own, and operate across the whole value chain — from production and storage to distribution, light-and heavy-duty fueling, and now fuel cell electric truck deployment our Vehicle Leasing Corporation (VLC).

Every day, we are making zero-emission travel and transport possible. We are building the low-carbon future we want to live in and leave behind for future generations.

CLEAN FUELS

Hydrogen production and liquefaction facilities

STATIONS & DISTRIBUTION

Hydrogen fueling stations and distribution solutions

TRANSPORTATION SOLUTIONS

Integrated services for zero emission, hydrogen-powered fleets

ABOUT HTEC

HTEC works across the clean hydrogen value chain to build sustainable, regionally connected hydrogen ecosystems that are fueling Canada's transition to zero-emissions transportation.

HTEC HIGHLIGHTS

2024-2025: Scaling Heavy-Duty and Production

- Opened new retail station on SE Marine Drive in Vancouver.
- Launched VLC Truck Leasing and H2 Gateway, deploying 100 fuel cell trucks.
- Secured \$337M CIB investment to expand hydrogen production and refuelling in Western Canada.

2023: Pilots and New Facilities

- Opened Kelowna station, broke ground on Burnaby plant.
- Launched BC's first hydrogen truck pilot and hydrogen port project.

2021-2022: Growth and Production

- Closed \$217M financing to drive infrastructure expansion.
- Announced agreement with ERCO Worldwide to co-locate a 15 TPD hydrogen plant in North Vancouver.

2018-2020: Retail Network Launch

- Opened Canada's first retail hydrogen stations in Vancouver, Burnaby, North Vancouver, and Victoria.
- Partnered with Shell and 7-Eleven; secured early investments and partnerships.

2005-2013: Foundations and Transit

- Built BC's first hydrogen purification and fueling infrastructure.
- Delivered a major hydrogen transit station in Whistler.
